

## **RIA CONNECT's THR compatible Terminal Blocks and Headers**

RIA CONNECT offers 3.5mm to 5.08mm headers and terminal blocks suitable for the Through-Hole-Reflow (THR) process; Thus retaining the strength of a thru-hole part, while employing the SMT process. These components are available on tape and reel for use in automated assembly lines. This packaging arrangement, along with THR compatibility, allows for increased yield on already existing production lines.
